PROFESSIONAL SUMMARY

QA Engineer with 4+ years of experience in manual and automation testing of web applications. Skilled in Selenium WebDriver, Rest Assured, and Apache JMeter, with hands-on experience in building automation frameworks for UI, API, performance, and security testing. Strong understanding of SDLC, STLC, and Agile methodologies, focused on delivering high-quality, scalable, and reliable software solutions.

TECHNICAL SKILLS

- Programming Language: Java
- Automation Tools: Selenium WebDriver, Rest Assured, Apache JMeter
- Frameworks: TestNG, Cucumber (BDD), Maven
- Tools & Platforms: Jenkins, Git, JIRA
- Testing Types: Automation Testing, API Testing, Functional Testing, Regression Testing, Performance Testing, Security Testing, Database Testing
- Security Tools: OWASP ZAP
- Concepts: SDLC, STLC, Agile (Scrum), CI/CD

PROFESSIONAL EXPERIENCE

QA Engineer - Picarro India Pvt Ltd

Jan 2025 – Present

- Developed a robust API automation framework from scratch using Rest Assured and TestNG
- Enhanced and optimized existing UI automation framework using Selenium WebDriver and Java, TestNG and Maven.
- Designed and implemented performance testing framework using Apache JMeter for load and stress testing
- Performed security testing using OWASP ZAP to identify vulnerabilities and risks
- Integrated API and UI automation suites with Jenkins CI/CD pipeline
- Created reusable utilities to improve framework scalability and maintainability
- Conducted functional, regression, API, performance, and security testing
- Collaborated with developers to debug issues and ensure faster defect resolution

Key Achievements:

- Built API automation framework, significantly improving API test coverage
- Identified performance bottlenecks, enhancing application response time
- Strengthened application security by detecting and reporting critical vulnerabilities

QA Engineer - Paxcom India Pvt Ltd

Sep 2021 – Dec 2024

- Owned end-to-end automation of smoke and regression test suites for web applications
- Designed and developed a hybrid automation framework using Java, Selenium WebDriver, TestNG, Cucumber, and Maven

- Implemented BDD framework using Cucumber to enhance collaboration with stakeholders
- Automated critical business scenarios, improving regression efficiency and test reliability
- Performed API testing using Rest Assured, validating request/response and business logic
- Integrated automation suite with Jenkins CI/CD pipeline for continuous execution
- Used Git for version control and worked in an Agile environment
- Logged, tracked, and managed defects using JIRA

EDUCATION

Bachelor of Technology (B.Tech) – Electrical Engineering
Biju Patnaik University of Technology, 2020
